

### **Women & RVs:**

Please join me and experience an education of the RV geared to a woman.

My name is Rachel Harp and I have been working in the RV industry for over 40 years. I own an RV business in Lincoln, CA and have been teaching women RV care and maintenance for over 20 years. My classes are informative, casual and educational and geared primarily to women in the RV industry.

The class that I will be teaching at this outing will help you have a better understanding of your RV and know what you should be doing to keep your RV in tip-top shape. This class will provide practical knowledge of your RV as well as what is needed to care for your investment. It will give you an overall view on your RV as well as the most common items needed. Topics will include normal maintenance requirements that are needed for the water system, electrical systems, propane systems and exterior/interior care. This class will be addressing the care of all types of RV's including trailers, campers, 5<sup>th</sup> wheels and all types of motorhomes. If time permits, there will be an open period for Q&A.
